

**BONESUPPORT CEO to present at the Medtech Showcase 2017,  
in conjunction with the 9th Annual Biotech Showcase™**

**Lund, Sweden, 6 January, 2017** – BONESUPPORT AB, an emerging leader in innovative injectable bioceramic bone scaffolds to treat bone voids caused by trauma, infection, disease or related surgery, announces that its CEO Richard Davies will present an overview of the company at 11:00hrs PST on Wednesday 11 January at the Medtech Showcase in San Francisco, US.

Medtech Showcase takes place in conjunction with the 9th Annual Biotech Showcase™.

During his presentation, Mr. Davies will introduce and describe commercial and development plans for BONESUPPORT's portfolio of proprietary CERAMENT™ products, which offer a single-stage procedure to fill bone voids effectively, and to reduce and manage infection; a compelling clinical value proposition for hospitals and payers to help reduce readmissions and hospital length of stay.

About BONESUPPORT™

BONESUPPORT AB has developed CERAMENT™ as an innovative range of radiopaque injectable osteoconductive bioceramic products that have a proven ability to heal defects by remodeling to host bone in six to twelve months. Our products are effective in treating patients with fractures and bone voids caused by trauma, infection, disease or related surgery. Our lead product, CERAMENT™ | BONE VOID FILLER (BVF) addresses important issues facing health care providers, such as avoiding hospital readmissions and revision surgery that result from failed bone healing and infection caused by residual bone voids. CERAMENT™ | BVF is commercially available in the U.S., EU, S.E. Asia and the Middle East.

CERAMENT™'s distinctive properties as a drug eluting material have been validated in clinical practice by CERAMENT™ | G and CERAMENT™ V, the first CE-marked injectable antibiotic eluting bone graft substitutes. These products provide local sustained delivery of gentamicin and vancomycin, respectively. The local delivery feature enables an initial high concentration of antibiotics to the bone defect and then a longer sustainable dose above the minimal inhibitory concentration (MIC) to protect bone healing and promote bone remodeling.

CERAMENT™ | G and CERAMENT™ V have demonstrated good results in patients with problematic bone infections including osteomyelitis. They are also used prophylactically in patients who are at risk for developing infection. CERAMENT™ | G and CERAMENT™ V are available in the EU.

BONESUPPORT AB was founded in 1999 by Prof. Lars Lidgren, an internationally respected scientist who has been the President of various musculoskeletal societies. BONESUPPORT's mission is to bring people with bone and joint diseases back to an active life. The company is based in Lund, Sweden.
